*'Redefining Healthcare-
Care Assured, With Compassion'*

CRESCENT HOSPITAL ALATHUR

www.crescenthospital.com

Service to Humanity is service to the Almighty

Crescent hospital started functioning on 1st of May 1997 with an Inpatient capacity of 50 beds. Today, after 8 years of arduous and efficient service, we have improvised a lot both in quality and quantity, dispensing the expertise and professionalism of about 25 doctors and 300 paramedics.

Construction of a new seven storey building commenced in 2003, of which three storeys were completed in 2004, raising the Inpatient capacity to 300 beds

Crescent Hospital has become the synonym for modern health care in this area, bringing in most of the advancements of modern medicine accessible to the common man. Looking back, it gives us immense satisfaction and justifies our courageous decision to accept the challenge and instigate such a health care facility in Alathur.

The hospital plans to start a CT Scan Unit and a full time Neurology department by the end of 2005. Other developments expected in the near future are:

- ✦ Blood Bank
- ✦ Cardiac Intensive Care Unit
- ✦ Colour Doppler Scan Unit
- ✦ Video graphic Laparoscopy

School of Nursing

The Nursing School of Crescent Medical Centre was established in 2001. The 3½-year GNM course offered is approved by the Kerala Nursing Council and has an annual intake of 20 students. Our first batch graduated in June 2004 with 100% results.

Highly qualified teaching faculty, well equipped laboratories & library and comfortable accommodation facilities are the salient features of Crescent School of Nursing.

New Schemes

Crescent Hospital is in the verge of another leap towards excellence and improvement. Important among the new developments is the decision to commence a College of Nursing, which will offer the Indian Nursing Council approved BSc. Nursing degree. The college is expected to start in the forthcoming academic year of 2005-06. In the five acres land procured for the purpose, preliminary works for the college building, students' hostel and staff quarters have already started.

Promoters

Crescent was primarily an idea of some inspired persons, for whom this is their homeland and the inhabitants are their relatives and friends. Alleviating the sufferings of the people was deemed as their God ordained duty towards the community.

The project, which was initiated with an estimated capital investment of 20 million has prospered and grown in due course of time. Today, Crescent Medical Centre is a joint venture of about 250 noble shareholders in India and abroad, with a total capital of 55 million.

Services

Crescent Hospital caters to all the basic health care requirements of the society. Besides the Outpatient department, the vast expanse of the hospital can accommodate over 300 inpatients. The Casualty and Trauma Care Unit is the central component for the management of acute medical emergencies and road traffic accident victims. The Intensive Care Unit and the Operation Theatres work round the clock to deal with critical cases and function as life saving units.

Auxiliary departments of health care, viz. the Pharmacy, Xray, ECG, Laboratory and Ambulance services also work 24 hours a day.

Facilities

Crescent Hospital is outfitted with state of the art amenities to deliver services at the maximum competence.

The Orthopaedic Operation Theatre uses state of the art C-Arm Image Intensifier for intra operative visualization of fracture fixation procedures.

Our Obstetrics department is the best in the district, which possess foetal cardiac monitors and an emergency Operation Theatre exclusively to handle high-risk pregnancies.

We offer excellent neo-natal care, which is unique in the district. Our NICU is equipped with Incubators, Pulse Oxy-meters, Radiant Warmers and Phototherapy units, which take care of pre-term babies and low birth weight infants.
